SUMMARY

Computer Science graduate (May 2026) with experience across AI model evaluation, software development, and technical support. Built and tested classification models in Python, Flask, and TensorFlow during a software engineering internship, and has evaluated AI-generated content professionally on a contract basis since late 2025. Recognized as St. Cloud State University's Best Senator for campus leadership.

SKILLS

Languages: Python, C, C++, JavaScript, PHP

Frameworks & Tools: Flask, TensorFlow, Pandas, Docker, Git, Agile

Web: HTML/CSS, Node.js, jQuery

Databases: MySQL, PostgreSQL, SQLite, MongoDB

EXPERIENCE

Generalist Expert (Contract) — AI Content Evaluator

Aug 2026 – Present

Mercor

Remote

- Evaluate AI-generated content — presentation decks, written pieces, search results — for accuracy and overall quality.
- Score content against structured rubrics, flag low-effort or low-quality outputs, and write feedback explaining why an output passed or failed review.
- Calibrate judgments against detailed evaluation guidelines to stay consistent across task types and batches.

AI Trainer (Contract) — AI Evaluation & Research Specialist

Nov 2025 – May 2026

Handshake

Remote

- Designed and tested prompts to evaluate reasoning, accuracy, and reliability across AI models, then documented recurring failure patterns.
- Completed Handshake's "Model Validation 2 – Expert" certification for structured evaluation work.

Software Developer Intern

Feb 2025 – May 2025

MaxwellStamp LLC

Elk River, MN (Hybrid)

- Built and tested classification models in Python using TensorFlow and Pandas, working under senior developer guidance.
- Prepped training data through feature engineering and normalization, then integrated trained models into Flask APIs running in Docker containers.

Product Flow Specialist

Sep 2024 – Dec 2024

Best Buy

St. Cloud, MN

- Processed and updated inventory for incoming truck shipments of up to 2,000 pieces, keeping placement and system records accurate.
- Wrote scripts to automate routine inventory checks previously done by hand, and provided front-line technical support for point-of-sale systems.

PROJECTS

GhostByte — Automated Content Pipeline

Personal Project, Apr 2026

- Self-hosted an automation pipeline (n8n, Docker) that turns a text prompt into a published short-form video with no manual steps in between, using the Gemini API for script generation.
- Combined text-to-speech narration, stock footage sourcing, and video assembly into one workflow, then published directly to YouTube through its API.

AI.Khan.BOT — Automated Market Signal Bot

Personal Project, May 2026

- Built a rules-based signal bot around a TradingView Pine Script strategy (RSI + EMA crossover), triggered through webhooks into a self-hosted n8n workflow.
- Monitored four cryptocurrency pairs and pushed real-time alerts to Telegram, with the full pipeline self-hosted on Docker.

EDUCATION

St. Cloud State University — Bachelor of Science in Computer Science

May 2026

Dean's List (Fall 2022); Certificate of Academic Achievement (Apr 2026)

LEADERSHIP

Vice Chair — Students United MN

Dec 2023 – Jul 2024

International Student Senator — SCSU Student Government Association

Aug 2024 – May 2025

Recognized with the Best Senator Award
